## Using Edgenuity with Instructional Services

Edgenuity's Instructional Services group is approved to provide courses directly to student athletes using Edgenuity's own highly qualified, state-certified virtual instructors. Our teachers provide synchronous instruction via chat, phone, and web meetings. They also provide written feedback on students' work, reteach concepts when students are struggling, and communicate regularly with school staff and parents. Combined with on-demand tutoring, students can always get the help they need when they need it.

**Schools using Instructional Services do not need to submit a Nontraditional Course Questionnaire; they are included in our eligibility status.**

## Using Edgenuity with District Teachers

Edgenuity curriculum is frequently used with district teachers instead of Edgenuity instructors from the Instructional Services group. However, if you are using district teachers, your school or district must contact the NCAA Eligibility Center to submit a Nontraditional Course Questionnaire to describe your implementation model.

Part of the NCAA's review of nontraditional schools and programs is a "Core Course Analysis," which examines the content and assessments being offered.

If you are using Edgenuity's approved initial-credit courses in their entirety with no customizations, it should not be necessary to submit the NCAA's "Core Course Analysis," which is the last question on the Nontraditional Course Questionnaire. Simply indicate that your district is using Edgenuity's approved core courses and attach a copy of your Edgenuity contract.

State-specific and honors versions of core courses—customized by Edgenuity—are also accepted by the NCAA. If you further customize Edgenuity’s base or state-specific courses, the NCAA may review your customizations as part of your application to ensure that they are equivalent in length, content, and rigor to face-to-face courses.

However, curriculum is only one element in determining NCAA eligibility; additional elements are grounded in how courses are implemented at your school. For more information on these guidelines and other NCAA requirements for nontraditional courses, please contact Edgenuity or the NCAA Eligibility Center.
